Product Description :

What is Aprepitant 125mg / 80mg Capsule?

Aprepitant 125mg / 80mg capsule is used in conjunction with other medications to treat both adults and kids aged six months of age and older for vomiting and nausea that may happen after chemotherapy for cancer. Aprepitant capsule belongs to the antiemetics drug class. It functions by preventing the effects of neurokinin, a brain chemical that naturally induces nausea and vomiting.

How to Use Aprepitant Capsule

Aprepitant is available as a capsule for treatment. During the initial days of your cancer chemotherapy treatment, aprepitant 125mg / 80mg capsule is often given once day, with or without meals, to avoid nausea and vomiting brought on by cancer chemotherapy.

- Ask your doctor to clarify any instructions you do not understand, and carefully follow the instructions on your prescription label.
- Follow the aprepitant directions precisely. Never take it in larger or less amounts or more frequently than your doctor has instructed.
- There are two different strengths of aprepitant capsules are available 125 mg and 80 mg. You can be given a prescription from your doctor to take both strengths at various intervals. Be careful to follow your doctor's instructions and take the appropriate dosage

at the appropriate time.

- Avoid splitting, chewing, or crushing the capsules; simply swallow them whole.
- Aprepitant 125mg / 80mg Capsule only used to prevent nausea and vomiting. If you already experience these symptoms, don't start taking aprepitant; instead, call your doctor.
- Aprepitant is typically only used for the first three days of chemotherapy treatment cycles when it is being used to reduce nausea and vomiting brought on by cancer chemotherapy. Take aprepitant only as long as your doctor has prescribed.

Precautions for Aprepitant 125mg / 80mg Capsule

Before consuming Aprepitant Capsule,

- Inform your doctor if you have any drug allergies or if you have any allergies to any of the components in aprepitant capsules.
- If you are on pimozide, avoid using aprepitant. If you are currently on this medicine, your doctor generally won't advise you to use aprepitant.
- Inform your doctor about any additional prescription and over-the-counter drugs, vitamins, dietary supplements, and natural remedies you are now taking or intend to use.
- Inform your healthcare expert if you are pregnant or breast feeding.

Benefits of Aprepitant Capsule

In the treatment of Vomiting and Nausea due to chemotherapy,

The aprepitant capsule prevents the body's chemicals from acting in a way that could make you feel ill or unwell. It is frequently used to stop vomit and nausea that could be brought on by certain medications or cancer therapy. This medication aids in a more comfortable recovery following cancer treatments like chemotherapy or radiation therapy. Additionally, it works well at reducing post-operative nausea and vomiting. To reap the greatest benefits, follow the doctor's instructions exactly.

Side Effects of Aprepitant 125mg / 80mg Capsule

- It's possible to feel tired or have the hiccups. Inform your healthcare expert right away if any of these side effects persist or worsen.
- Keep in mind that your doctor has recommended this medication because they believe it will benefit you more than it will harm you. Many users of this medication report no significant side effects.
- It is extremely unlikely that this medication may cause a severe allergic reaction. However, if you experience any serious allergic reaction symptoms, such as a hives, swelling, or itching (especially of the face, tongue, or throat), severe dizziness, or difficulty breathing, seek medical attention right away.

All the possible side effects are not covered here. Contact your doctor if you experience any additional effects not covered above.
