## Product Description :

---

### What is Cetirizine 5 mg Tablet?

Cetirizine 5 mg Tablet is used in the treatment of the symptoms of hay fever (allergic reactions to pollen, dust, or other particles in the air) and other allergies. Sneezing, runny nose, itchy, red, watery eyes, and an itchy nose or throat are some of the symptoms. Cetirizine can also be used to relieve hives' itching and redness. Cetirizine, on the other hand, does not protect against hives or other skin irritation. It belongs to the antihistamine class of drugs. It works by preventing histamine, a chemical in the body that produces allergy symptoms, from acting.

#### How To Use Cetirizine

- Cetirizine is available in the form of a tablet, a chewy tablet, an extended-release tablet, and a syrup for oral administration. It's taken once a day, both with and without food. Every day, around the same time, take cetirizine.
- Follow the instructions on your package label properly, and if there is anything you don't understand, ask your doctor to describe it to you.

- Cetirizine should not be used to cure hives that are damaged or blistered. If you get these sorts of hives, see your doctor.
- If your hives do not diminish after the first three days of treatment or if they last longer than six weeks, avoid taking cetirizine and contact your doctor.
- If you're using Cetirizine 5 mg Tablet for hives and experience any of the symptoms listed, get immediate medical attention: Wheezing, drooling, dizziness, difficulties swallowing, or breathing problem.

#### **Benefits of Cetirizine Tablet**

Cetirizine tablet is very helpful to relieve symptoms like a congested or runny nose, sneezing, and itchy eyes. It will be better for you to go for your everyday tasks as a result of this. It can also help with allergic reactions from bug bites, as well as hives and eczema symptoms like redness, swelling, itching, and inflammation. This will enhance the skin's appearance, and you may also notice an improvement in your attitude and self-confidence. It has few major side effects, and you may only need to use it on days when you are experiencing symptoms. To receive the maximum benefit from it, you should take it on a regular basis if you're using it to prevent symptoms.

#### **Precaution - Cetirizine 5 mg Tablet**

- If you have an allergy to cetirizine, hydroxyzine, or other medicine, tell your doctor.
- Tell your doctor about any prescription and OTC medications, vitamins, nutraceuticals, and herbal products you're using or planning to use.
- If you have or have previously had kidney or liver illness, tell your doctor.
- If you have a pregnancy, planning to become pregnant, or breastfeeding, notify your doctor.
- You should be aware that cetirizine can cause drowsiness. Do not drive or operate heavy machinery until you have a better understanding of how this drug affects you.
- Keep in mind that drinking can worsen the drowsiness brought on by this drug. While taking this drug, stay away from alcoholic beverages.

#### **Side Effects of Cetirizine**

The majorities of side effects are minor and will go away as your body adapts to the medication. If they don't go away or you're worried, consult your doctor.

- Drowsiness, exhaustion, and a dry mouth are all possible side effects. Stomach pain is also possible, particularly in children. Inform your doctor immediately if any of these side effects persist or worsen.
- Remember that if your doctor has recommended Cetirizine 5 mg Tablet, it means that the advantage to you exceeds the risk of adverse effects. The majority of people who take this medicine do not have any substantial adverse effects.
- If you experience any major side effects, such as problems urinating or weakness, contact your doctor immediately.

#### Some Tips for Cetirizine Tablet

- Cetirizine 5 mg Tablet was given by your doctor to assist reduce allergy symptoms like itching, swelling, and rash.
- It's considerably less likely than other similar medicines to make you sleepy.
- Most other medicines can be taken with Cetrizine Tablet because it has minor drug interactions.
- Because Cetrizine Tablet can cause dizziness and tiredness, take caution while driving or doing something that demands concentration.
- Alcohol should not be used while using Cetrizine Tablet since it may cause drowsiness.
- It's best to wait at least 3 days before getting an allergy test if you're taking Cetrizine Tablet.
