

# Anastrozole Tablets

## Product Information :

---

Pharmaceutical form : Tablet

Category : Anti Cancer

Pack : -

Brand name : -

Content : -

Therapeutic Use : -

## Product Description :

---

### What are Anastrozole Tablets?

Anastrozole tablets are an aromatase inhibitor, which is a class of medications to treat breast cancer in postmenopausal women. In the treatment of breast cancer in women, it is combined with other therapies such as surgery or radiation.

#### How Does It Work

Anastrozole tablets work by inhibiting the enzyme aromatase, which is responsible for oestrogen production, lowering the quantity of oestrogen in the body. This, in turn, slows the progression of breast cancer and prevents cancer cells from spreading to other parts of the body. It binds to the heme of CYP19 in a competitive and selective manner.

#### How To Use Anastrozole Tablets

- Take Anastrozole Tablets exactly as directed by your doctor in terms of dosage and frequency. Take it all in at once.
- The tablet should not be chewed, crushed, or broken. One tablet per day is the

recommended dosage. It is possible to take it with or without food.

- To receive the best benefit from this medicine, take it on a daily basis. Consume it at the same time every day to help you remember.
- Women who are pregnant or may have become pregnant should not hold this medicine or breathe the dirt particles from the tablets because it can be absorbed into the body and lungs and harm an unborn baby.

#### Side Effects Of Anastrozole

- Hot flashes, headaches, insomnia, dizziness, stomach upset, nausea/vomiting, constipation, diarrhoea, loss of appetite, weight gain, weakness, excessive coughing, or a sore throat are all possible side effects.
- If you experience any serious side effects, such as bone pain, muscle pain, mood changes, tingling skin, swelling hands-ankle-feet, breathlessness, unusual vaginal discharge, vision changes, or signs of liver disease, contact your doctor immediately.

#### Precautions Of Anastrozole

- If you are allergic to anastrozole tablets or have any other allergies, contact your doctor before taking them.
- Tell your doctor about any medical conditions you have, especially heart disease, bone loss (osteoporosis), liver disease, high blood pressure, and blood clots, before taking this drug.
- This medication has the potential to make you dizzy. You may become dizzy if you consume alcohol. Do not drive, operate machinery, or engage in any other activity that requires attentiveness until you are sure you can do so safely.
- Limit your intake of alcoholic beverages.

#### FAQ

- **Is it true that anastrozole capsules cause weight gain?**
- Weight gain is possible with anastrozole, but it is uncommon. There may be additional

factors that contribute to weight increase, such as menopause. If you gain weight while on Anastrozole tablets, however, follow exercise and diet often.

- **Is Anastrozole linked to hair loss?**
- Anastrozole tablets usually cause hair thinning, which results in hair loss. It does not, however, happen to everyone. These effects aren't permanent, and they may fade with time.
- **Is it possible to take anastrozole at night?**
- Anastrozole is a medication that can be used at any time of day. Follow your doctor's instructions to the letter.
- **In what circumstances should I call my doctor while on Anastrozole?**
- If you have a major adverse reaction, you should consult your doctor. If you experience persistent or severe stomach pain, significant weakness, or acute pain, call your doctor right away.
- **Anastrozole is used by bodybuilders for a variety of reasons.**
- Anastrozole is used by bodybuilders who use anabolic steroids to suppress oestrogen production, which is a reaction to anabolic steroids. Increased oestrogen levels in bodybuilders can lead to a higher-pitched female voice, testicular or penile shrinkage, and breast augmentation. Anastrozole is used by bodybuilders to avoid these traits.
- **What is the most crucial information regarding Anastrozole that I should be aware of?**

- The most important thing to remember about Anastrozole tablets is that it has the potential to cause heart problems. Women with early breast cancer who have blockages in their cardiac arteries may experience increased symptoms of reduced blood flow to their heart.

#### **Anastrozole Tablets Supplier**

Healthiza is one of the leading Anastrozole Tablets supplier and manufacturer, offering the best quality medicine globally through a validated cold chain secure shipment process. We use this process to manufacture, store and deliver medicines at a very specific temperature. Customers can avail of this premium quality pharma product at an affordable price from us.
