---

### What is Daclatasvir Tablet?

Daclatasvir Tablet is always used to treat a specific kind of chronic Hepatitis C Virus. It is also used with other combination of medicine such as

### [Sofosbuvir](#)

. Daclatasvir is belongs to the hepatitis C virus (HCV) NS5A inhibitors class of antivirals. It works by preventing the hepatitis C virus from growing inside the body. It is unknown whether daclatasvir helps to prevent the transmission of hepatitis C to others.

### Daclatasvir Tablet - How To Use

- Daclatasvir is available as a tablet to be swallowed. It is normally taken once a day, with or without food.
- It must be used in conjunction with sofosbuvir for a period of time, usually 12 weeks. Every day, around the same time, take daclatasvir tablet. It should be taken exactly as prescribed. Do not use more or less of it, or take it more frequently than your doctor has

suggested.

- Even if you start feeling better, keep taking daclatasvir. Do not Stop taking daclatasvir tablet without consulting your doctor.

#### **How It Works**

Daclatasvir is a type of antiviral drug. It works by reducing the amount of hepatitis C virus in the body and eliminating it from the blood over time.

#### **Precaution for Daclatasvir**

**Before taking daclatasvir tablet,**

- If you have an allergy to daclatasvir or any other components, notify your doctor.
- If you're using carbamazepine, phenytoin or rifampin, inform your doctor. If you are using one or more of these medications, your doctor will probably advise you not to use daclatasvir.
- Tell your doctor about any additional prescription or over-the-counter medications, vitamins, or nutritional supplements you're taking or planning to use. Make a point of mentioning one or more of the following:

[itraconazole](#)

,

[ketoconazole](#)

, posaconazole, and

[atorvastatin](#)

, fluvastatin, pitavastatin, pravastatin, and rosuvastatin. Your specialist may need to adjust your prescription dosages or keep a close eye on you for side effects.

- If you've had a liver transplant or if you have any form of liver illness other than hepatitis C, or if you have heart problems, notify your doctor.
- If you are pregnant, planning to become pregnant, or breastfeeding, notify your doctor. Call your doctor if you become pregnant while taking daclatasvir tablet.

**Daclatasvir Tablet - Side Effects**

- Tiredness, headaches, nausea, and diarrhoea are all possible side effects. Talk to your doctor right away if any of these side effects persist or worsen.
- Keep in mind that your doctor ordered this medication because he or she believes the benefit to you exceeds the risk of adverse effects. The majority of people who take this medicine do not have any substantial adverse effects.
- This medicine rarely causes a severe allergic reaction. However, if you detect any symptoms of a major allergic response, such as a rash, itching/swelling (particularly of the face/tongue/throat), extreme dizziness, or problems breathing, seek medical

treatment right away.

- Consult the doctor if you have any other side effects not listed above.
