Product Description :

What is Hepcvir Tablet?

Hepcvir Tablets contain Sofosbuvir, which belongs to the antiviral medication class. It is used with the conjunction of other drugs such as ribavirin and peginterferon for the treatment of acute and chronic hepatitis C virus (HCV) infection. It works by reducing the amount of the hepatitis C virus in the body and eliminating it from the blood over time.

Hepcvir Tablets - How To Use

- Always take Hepcvir Tablets precisely as directed by your doctor.
- Do not crush or chew, and take whole with plenty of water. It is possible to take it with or without food.
- Hepcvir Tablets should be consumed according to your doctor's instructions for dosage and duration.
- Even if you feel better, do not miss any doses and complete the entire course of treatment.

- If you forget to take a dose, do so as soon as possible. However, if your next dose is approaching, skip the missing dose and return to your normal schedule. Do not take two doses.

How Hepcvir Tablets Works

Hepcvir Tablets work by reducing hepatitis C virus levels in the body and removing the infection from the blood over time.

Benefits of Hepcvir Tablets

In Chronic Hepatitis C Virus infection

The HCV virus is prevented from growing in your body by taking Hepcvir Tablet. It aids in the control of infection and improves the immune system's performance. This reduces your risk of problems and enhances your overall quality of life. This medication is always given with other antiretroviral medications. It is not a cure for HCV infection and should not be used to eliminate it. It is essential that you take this medication exactly as directed by your doctor, including the dosage. The benefit of the medicine is substantially enhanced when all doses are taken in the correct amounts and at the correct times.

Hepcvir Tablets - Side Effects

When compared to other similar medicines, Hepcvir has fewer negative effects such as fatigue, headache, nausea, insomnia (difficulty sleeping), Chills, White ulcers in the mouth, Pain in the lower back, Rashes, Diarrhea, Appetite decrease, Muscle cramps and pain and anaemia (low red blood cell count). If any side effects last longer than expected, contact your doctor.

Some Tips for Hepcvir Tablet

- Hepcvir Tablet is a medicine that is used in conjunction with other medications to treat chronic hepatitis C virus (HCV) infection.
- Even if you feel better, do not miss any doses and complete the entire course of treatment.
