

Emtricitabine Tablet

Product Information :

Pharmaceutical form : Tablet

Category : Anti Cancer

Pack : 1x30/Cap

Brand name : Emtricitabine Tablet

Content : Emtricitabine 200 Mg

Therapeutic Use : To Help Control HIV Infection

Product Description :

What is Emtricitabine Tablet?

Emtricitabine is a medicine that is used in the treatment of HIV infection in combination with other drugs. Emtricitabine belongs to a group of drugs known as nucleoside reverse transcriptase inhibitors (NRTIs). It works by lowering HIV levels in the bloodstream. Despite the fact that emtricitabine does not prevent HIV, it may reduce your risk of acquiring AIDS and HIV-related diseases such as severe conditions or cancer. These drugs, together with safer sex practices and other lifestyle modifications, may reduce the risk of spreading (spreading) the HIV virus to others.

Emtricitabine Tablet - How To Use

Emtricitabine is available as a tablet, capsule and an oral solution (liquid). It's taken once a day, with or without food. Emtricitabine should be taken at the same time each day. Follow the advice on your medicine prescription properly, and if there is anything you don't understand, ask your specialist to explain it to you. Emtricitabine tablet should be taken exactly as prescribed. Do not use more or less of it, or take it more frequently than your doctor has suggested. Emtricitabine Tablet is an antiretroviral drug that protects against HIV

infection but does not treat it. Even if you start feeling fine, keep taking emtricitabine. Stopping emtricitabine without consulting your doctor is not a good option. Your disease may become harder to treat if you skip a dose or stop using an emtricitabine tablet.

Emtricitabine Tablet - Precaution

Before taking Emtricitabine,

- If you are sensitive to emtricitabine or any other drugs, notify your doctor. or any of the substances in the oral solution and capsules of emtricitabine
- Inform your doctor about any additional drugs, vitamins, nutraceuticals, or herbal products you're taking or planning to use. Other [HIV drugs](#) having emtricitabine or containing lamivudine should be mentioned. Your specialist may need to adjust your prescription dosages or keep a careful watch on you for adverse effects.
- Inform your doctor if you have or ever had a persistent or recurrent infection, such as tuberculosis (TB; a form of lung infection) or cytomegalovirus (viral infection that can produce complications in patients with weakened immune systems), or if you have liver or kidney illness.
- If you are pregnant or expect to become pregnant, notify your doctor. Call your doctor when you become pregnant when receiving Emtricitabine Tablet. If you're breastfeeding, let your doctor know. Breastfeeding is not recommended if you have HIV or are on emtricitabine.
- You should be aware that when taking HIV drugs, your immune system may become stronger and start to fight other viruses already present in your body. It's possible that you'll experience symptoms of those diseases as a result of this. Tell your doctor if you have new or severe symptoms after beginning emtricitabine medication.
- Store this medicine tightly wrapped in the containers it came in and out of the hands of children. Keep the Emtricitabine Tablet at room temp, out of direct sunlight, and away from moisture and heat. Keep the oral solutions in the refrigerator but not the freezer. You can keep the oral solution at room temp for up to 3 months if you don't want to refrigerate it.

Emtricitabine Tablet - Side Effects

- Headache, diarrhoea, insomnia, or a deepening of the skin color on the palms and soles of the feet are all possible side effects. Inform your doctor right away if any of these side effects persist or increase.
- Note that your doctor provided this medicine because he or she believes the advantage to you exceeds the risk of adverse effects. The majority of people who take this medicine do not have any substantial adverse effects.
- As your immune cell strengthens, it may be able to fight off previous infections, leading disease symptoms to resurface. If your immune cells get overactive, you may have symptoms. This reaction could occur at any time (After starting HIV medication or after some months).
- If you have any severe symptoms, such as unexplained weight loss, extreme tiredness, persistent weakness, severe or persistent headaches, joint pain, tingling of the hands/feet/arms/legs, changes in vision, signs of infection (fever, chills, difficulty breathing, cough, non-healing skin sores), signs of an overactive thyroid (irritability, nervousness, heat intolerance, rapid heartbeat, bulging eyes, thyroid)
- If any of the following unlikely but serious side effects develop, contact your doctor straight away: such as mood changes (depression). This medicine can cause serious (and occasionally fatal) liver and blood abnormalities in certain people (lactic acidosis). If you experience signs of liver disease (constant vomiting, lack of appetite, stomach discomfort, yellowing eyes/skin, dark urine), or lactic acidosis (breathlessness, drowsiness, nausea/vomiting, abnormal weakness), call your doctor immediately.
- This medicine rarely causes a severe allergic reaction. However, if you detect any signs of significant allergic response, such as a rash, itching/swelling (particularly of the face/tongue/throat), extreme dizziness, or problems breathing, seek medical help immediately.
- This isn't an entire list of potential adverse effects. Contact your doctor if you experience any other side effects not mentioned above.

Emtricitabine Tablet - Some Tips For Use

- Do not share your medicine with anyone else.
- Keep a documented note of all the prescribed and non - prescription drugs (over-the-counter) or medicines you're taking, as well as any vitamins, minerals, or other nutritional supplements you're taking. If you consult a doctor or are hospitalized, you should carry this list with you. It's also useful knowledge to have on hand in case of an emergency.

Emtricitabine Tablet Supplier

Healthiza is one of the leading Emtricitabine Tablet supplier and manufacturer, offering the best quality medicine globally through a validated cold chain secure shipment process.
