

Estramustine Phosphate Capsule

Product Information :

Pharmaceutical form : Capsule

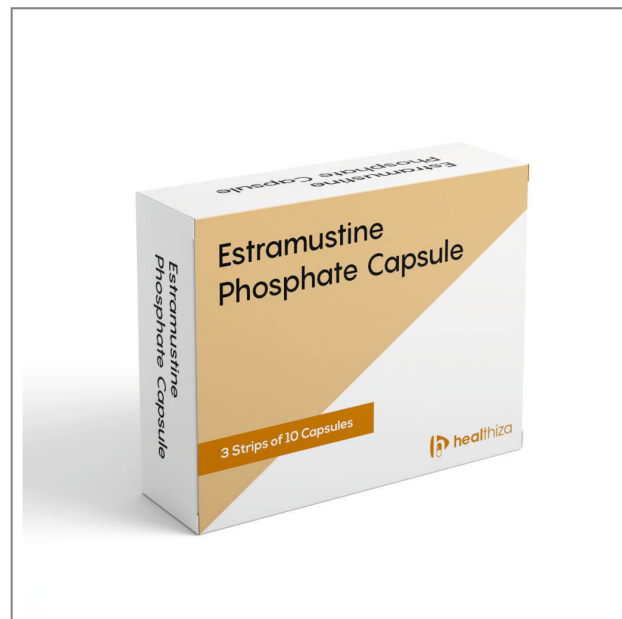

Category : Anti Cancer

Pack : 1x30/Bott

Brand name : Estramustine Phosphate Capsule

Content : Estramustine 140 mg

Therapeutic Use : Prostate cancer

Product Description :

What is Estramustine Phosphate Capsule?

Estramustine Phosphate Capsule is used in the treatment of prostate cancer that has progressed to other places of the body or has worsened. Estramustine belongs to the antimicrotubule agent class of drugs. This medicine is supposed to function by boosting estrogens, which inhibit prostate cancer, as well as preventing or slowing cancer cell proliferation and spread. It could also be used in the treatment of other problems if the doctor thinks it's necessary. It's sometimes combined with other drugs as part of a chemotherapy treatment plan.

Estramustine Phosphate Capsule - How To Use

Estramustine is available in the form of a capsule to be taken by mouth. It's commonly taken three to four times a day with water, at least 60 minutes before or after meals. Estramustine should not be taken with milk, dairy products, or foods high in calcium. Every day, use estramustine at the same time. Always follow the advice on your medication label. Use this medicine exactly as prescribed by your doctor. Should not take more or less of it, or take it more frequently than your doctor has suggested. Estramustine may slow the progression of

cancer, but it will not eliminate it. It could take up to three months for your doctor to determine whether this drug is effective for your situation. During your medication, be sure to let your doctor know how you're feeling. Even though you feel healthy, keep taking Estramustine Phosphate Capsule. Stopping estramustine without consulting your doctor is not a good option.

BENEFITS OF Estramustine Phosphate Capsule

In Prostate cancer

In males, the prostate gland is a little walnut-sized gland that generates seminal fluid, which nourishes and transmits sperm. The most common sign of prostate cancer is trouble urinating, however, it can also occur without any symptoms. By lowering the level of testosterone (a natural hormone in men), Estramustine Phosphate Capsule prevents the growth of cancer cells. This also helps make it easier to urinate by easing the difficulties in passing urine.

Estramustine Phosphate Capsule - Precautions

Before taking Estramustine Phosphate Capsule

- If you are sensitive to estramustine, estradiol, nitrogen mustard, or other drugs, inform your doctor.
- Tell your doctor about any additional drugs, vitamins, nutraceuticals, or herbal products you're taking or planning to use.
- Use calcium supplements or antacids containing calcium, such as Alka-Mints, Tums, or Titralac, at least two hours before or after receiving estramustine.
- If you have ever had a blood clot, diabetes, increased blood pressure, a stroke, chronic heart disease, migraines, seizure, or any other conditions that influence calcium and phosphorous balances in your body, such as parathyroid issue or liver or kidney problems, consult your doctor.
- You should understand that estramustine is only to be used in men. Estramustine Phosphate capsules may cause foetal harm. If there's a chance your spouse could get pregnant while you're on estramustine, you must use effective birth control. Estramustine

Phosphate Capsule should not be used by women who are pregnant or may have become pregnant. If you are using estramustine while pregnant, contact your doctor right away.

- Store this medicine tightly wrapped in the packaging it came in and out of the reach of children. Estramustine pills should be kept in the refrigerator.

Estramustine Phosphate Capsule - Side Effects

The majorities of side effects are minor and will go away as your body adapts to the medication. If they don't go away or you're concerned about them, see your doctor.

- It is possible to experience nausea, vomiting, lack of appetite, flush, dryness, headache, leg cramps, reduced sexual interest, and male chest enlargement. Inform your doctor right away if any of these side effects persist or increase.
- Remember that your doctor provided this medicine because he or she believes the advantage to you exceeds the risk of adverse effects. The majority of people who take this medicine do not have any substantial adverse effects.
- This medication has the ability to boost your blood pressure. Regularly monitor your blood pressure and notify your doctor if the readings are too high.
- If any of the following unlikely but dangerous negative effects occur: mood changes (depression), swelling of the hands/feet, worsening of seizures, or evidence of poor diabetes, contact your doctor immediately.
- Heart attacks, strokes, and blood clots are all possible side effects of this medicine. If you get chest/jaw/left arm discomfort, severe headache, weakening on one side of the body, disorientation, difficulties speaking, sudden vision changes, leg pain, breathlessness, coughing up blood, or sudden dizziness/fainting, seek medical help immediately.
- If you have any of the following rare but significant side effects such as easy bleeding, stomach pain, persistent vomiting, nausea, dark urine, or yellowing eyes/skin, contact your doctor immediately.
- This medicine has the potential to reduce the body's resistance to infection. If you acquire any symptoms of infection, such as a fever, chills, or a severe sore throat, call your doctor immediately.

- This medicine rarely causes a severe allergic reaction. However, if you detect any symptoms of significant allergic response, such as a rash, itching/swelling (particularly of the face/tongue/throat), extreme dizziness, or breathing problem, seek medical help immediately.
- This isn't a full list of potential adverse effects. Consult your doctor if you have any other side effects not listed above.

Estramustine Phosphate Capsule - Some Tips For Use

- Use Estramustine Phosphate Capsule on an empty stomach, at least 60 minutes before or two hours after food.
- Antacids, calcium or magnesium supplements, milk products, and multivitamins should all be avoided since they may interact with the medicine's effectiveness.
- Your doctor may order routine blood tests to check your calcium level, organ function, and blood cell count.
- To avoid getting pregnant while using this drug, use an effective birth control option.
- Do not discontinue taking your medication without first consulting your doctor.

Estramustine Phosphate Capsule Supplier

Healthiza is one of the leading Estramustine Phosphate Capsule supplier and manufacturer, offering the best quality medicine globally through a validated cold chain secure shipment process. We use this process to manufacture, store and deliver medicines at a very specific temperature. Customers can avail of this premium quality pharma product at an affordable price from us.
