

Clobetasol Propionate & Salicylic Acid Ointment

Product Information :

Pharmaceutical form : External Preparation

Category : OTC

Pack : 1x20gm

Brand name : Clobetasol Propionate & Salicylic Acid Ointment

Content : Clobetasol (0.05% w/w) + Salicylic Acid (6% w/w)

Therapeutic Use : Treatment of Eczema & Psoriasis

Product Description :

What is Clobetasol Propionate & Salicylic Acid Ointment?

Clobetasol Propionate & Salicylic Acid Ointment is a medication that combines two medications to treat eczema and psoriasis. Eczema is a skin ailment that causes inflamed, itchy, cracked, and rough patches of skin. Blisters are another symptom of some types of eczema. Psoriasis is a skin condition in which skin cells proliferate up to ten times faster than normal, resulting in uneven red patches covered in white scales. These can grow on any part of the body, but they're most frequent on the scalp, elbows, knees, and lower back.

How It Works

- Clobetasol and salicylic acid are present in this Ointment. Clobetasol is one type of steroid that acts by inhibiting the formation of chemical messengers called prostaglandins, which cause the skin to become red, puffy, and itching.
- Salicylic Acid is a keratolytic medication that helps soften the skin by breaking down clumps of keratin, removing dead skin cells, and causing desquamation of the cornified epithelium or sticky layer of skin.

- It also enhances Clobetasol absorption through the skin.

How to Use

- Clobetasol Propionate & Salicylic Acid Ointment should always be used according to the doctor's instructions for dosage and duration.
- Before using, it's a good option to read the instructions on the label. It is only for external usage.
- Before and after using this drug, wash your hands thoroughly. Apply a sufficient amount to completely cover the affected region.

Precautions of Medications

- Long-term use of this medication should be avoided because it can cause difficulties with the adrenal glands.
- If you have blurred vision, dizziness, or fainting, a fast, irregular heartbeat, excessive thirst or urination, irritability, or abnormal tiredness or weakness, you should stop taking this medicine.

Benefits - Clobetasol Propionate & Salicylic Acid Ointment

- Clobetasol Propionate & Salicylic Acid Ointment acts by inhibiting the generation of specific molecular messengers (prostaglandins) that cause redness, swelling, and itching in the skin.
- It softens, separates, and desquamates the cornified epithelium or sticky layer of skin, as well as breaks down keratin clumps, eliminates dead skin cells, and aids in skin softening.

Side Effects

- It can produce adverse effects, though not everyone experiences them. If you have side effects such as burning, itching, dryness, or irritation, you should see a doctor.
- Breaking of the skin, shrinking of the skin, burning, itching, inflammation, and redness at the site of application are all possible side effects.
- The majority of side effects do not require medical care and go away with time. However,

if the negative effects do not go away, consult your doctor.

Some Tips for Using

- When taking a bath, use mild soap and opt for a warm bath.
- On your skin, do not use harsh products.
- To avoid infecting the affected region, do not rub or pick at it.
- To prevent skin dryness during therapy, apply a light moisturizer on a daily basis.
- Unless recommended by a doctor, do not wrap the area getting treated with airtight coverings such as bandages, as this may enhance the chances of side effects.
- Manage your stress, eat well, drink enough of water, daily exercise, and sleep well.

Clobetasol Propionate & Salicylic Acid Ointment Supplier

Healthiza is one of the leading Clobetasol Propionate & Salicylic Acid Ointment supplier and manufacturer, offering the best quality medicine globally through a validated cold chain secure shipment process. We use this process to manufacture, store and deliver medicines at a very specific temperature. Customers can avail of this premium quality pharma product at an affordable price from us.
