

Gamabenzen Hexachloride & Cetrимide Emulsion

Product Information :

Pharmaceutical form : External Prepration

Category : OTC

Pack : 1x100ml

Brand name : Gamabenzen Hexachloride & Cetrимide Emulsion

Content : Gamma Benzene Hexachloride (1% w/w)

Therapeutic Use : Scabies

Product Description :

What is Gamabenzen Hexachloride & Cetrимide Emulsion

Gamabenzen Hexachloride & Cetrимide Emulsion is a topical antiseptic, which is generally used to heal wounds, cuts, and mild burns, as well as to prevent infections. Scabies (a contagious, very irritating skin illness caused by a tiny, burrowing mite) and pediculosis are also treated with it (when tiny insects infest the scalp).

How to Use

- It is available in two forms: lotion/emulsion and cream.
- Use it as directed by your doctor. Before applying cream or lotion, wash your hands.
- It should only be used for external use. After using it, do not touch or contact your nose or eyes.

Precautions - Gamabenzen Hexachloride & Cetrимide Emulsion

- Please inform your doctor if you have allergies to it or any other medications. It should only be used externally.
- It should not come into contact with the nose, ears, mouth, or eyes. If it accidentally comes into contact with these locations, thoroughly rinse with water.
- Avoid taking large doses or taking it for longer than recommended because it does not provide faster or better results and increases the risk of side effects.
- It is not suggested for seizure patients.

Its Benefit

Gamabenzen Hexachloride & Cetrimide Emulsion is a topical antiseptic that comprises Cetrimide and Gamma benzene hexachloride. It is generally used to treat wounds, cuts, and mild burns, and to prevent infection. Scabies (a contagious, very irritating skin illness caused by a tiny, burrowing mite) and pediculosis are also treated with it (tiny insects infest the scalp). Cetrimide has antibacterial, antifungal, and antiseptic effects. Cetrimide disrupts or destroys the cell membranes of bacteria, causing them to die. The lice, eggs, and mites of scabies are killed with gamma benzene hexachloride (lindane).

Side Effects

- The majorities of side effects are minor and will go away as your body adapts to the medication. If they don't go away or you're concerned about them, see your doctor.
- Skin rash, burning, itching, tingling, numbness and irritation

Some Tips for Using It

- Before and after using it, wash your hands.
- It's best not to get it in your eyes, nose, or mouth. If this happens, quickly rinse with water.
- Maintain a clean environment.
- Include alkaline fruits and vegetables, as well as entire grains.
- After 8 to 12 hours, rinse the lotion/cream from your skin. It must be entirely removed from your body. Warm, but not hot, water should be used.

Gamabenzen Hexachloride & Cetrимide Emulsion Supplier

Healthiza is one of the leading Gamabenzen Hexachloride & Cetrимide Emulsion supplier and manufacturer, offering the best quality medicine globally through a validated cold chain secure shipment process. We use this process to manufacture, store and deliver medicines at a very specific temperature. Customers can avail of this premium quality pharma product at an affordable price from us.
