Pack : 90ml

Brand name : Ketoconazole & Zincpyrithion (ZPTO) Shampoo

Content : Ketoconazole (2% w/v) + Zinc pyrithione (1% w/v)

Therapeutic Use : Treatment of Dandruff

Product Description :

About Ketoconazole & Zincpyrithion (ZPTO) Shampoo?

Ketoconazole & Zincpyrithion (ZPTO) shampoo is used to treat a specific type of skin problem (seborrheic dermatitis, a type of dandruff). A fungus (*Malassezia furfur*) is thought to infect the skin or scalp in this condition, causing dry, itchy skin (scales) on the head, face, ears, chest, or back. Ketoconazole is a type of azole antifungal that acts by inhibiting fungus development.

How to Use

- Only apply this medicine to your scalp and skin. Clean and dry the region to be treated thoroughly. Hands should be washed before and after using this medicine. Apply it once a day to the affected area as well as a tiny piece of normal skin close to it, or as prescribed by your doctor.
- Treatment lasts between two and four weeks, depending on the patient's reaction. Do not use this product more than once a day.

- Avoid getting this medicine in your eyes, nose, or mouth. If this happens, make a thorough wash with enough water. If inflammation occurs, consult your doctor as soon as possible.
- To receive the best benefit from this drug, take it on a daily basis.
- After applying this treatment, wait at least 3 hours before washing the treated area. Before using sunscreen or makeup to the treated areas, wait at least twenty minutes.

Precautions - Ketoconazole & Zincpyrithion (ZPTO) Shampoo

- If you have allergies to ketoconazole or other azole antifungals like clotrimazole, econazole, or miconazole, or if you have any other allergies, inform your doctor before using it. Inactive chemicals may be included in this product, causing adverse reactions or other issues.
- This drug should only be taken during pregnancy if absolutely necessary. Consult your doctor about the dangers and advantages.

How it works

Ketoconazole & Zincpyrithion (ZPTO) Shampoo is an antifungal medication that combines two antifungal drugs: ketoconazole and zinc pyrithione. It works by killing the fungi that produce dandruff's cell membrane.

Side Effects - Ketoconazole & Zincpyrithion (ZPTO) Shampoo

The majorities of side effects are minor and will go away as your body adapts to the medication. If they don't go away or you're concerned about them, see your doctor.

- The treated skin may experience burning, redness, or dryness. Tell your doctor immediately if any of these side effects persist or worsen.
- Remember that your doctor provided this medication because he or she believes the benefits to you exceed the risk of adverse effects. The majority of people who take this medicine do not have any substantial adverse effects.
- If any of these rare but significant adverse effects develop, contact your doctor immediately: eye swelling, itching and irritation at the application site.

Some Tips for Ketoconazole & Zincpyrithion

- Your doctor will tell you to apply Ketoconazole & Zincpyrithion (ZPTO) shampoo to the affected area.
- Do not use this drug too often or for more than your doctor prescribes.
- Wash the infected area with water and soap before each application and thoroughly dry it.
- It's best not to get it in your eyes, mouth, or nose. If you get it in these places by accident, rinse with cold water.
- If you experience any irritation or another skin infection, discontinue using Ketoconazole & Zincpyrithion and tell your doctor.
- If the treated skin region does not recover after 2-4 weeks of treatment, contact your doctor.
