

Sofosbuvir Tablet 400 mg

Product Information :

Pharmaceutical form : Tablet

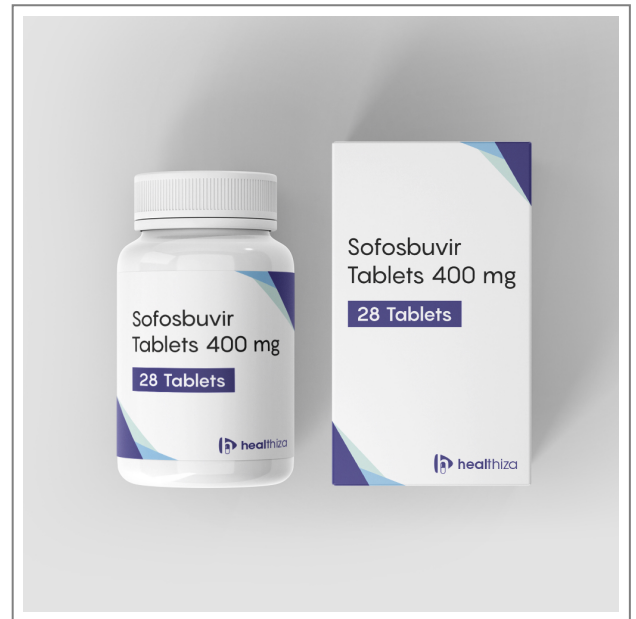

Category : Prescription Medicine

Pack : Pack of 28 Tablets

Brand name : sofosbuvir

Content : sofosbuvir tablets 400 mg

Therapeutic Use : To treat chronic (long-lasting) hepatitis C, a viral infection of the liver.

Product Description :

What is Sofosbuvir Tablet 400 mg?

Sofosbuvir tablet 400 mg is used with ribavirin and sometimes another medicine for the treatment of certain types of chronic hepatitis C (a continuous viral infection that destroys the liver) in adults and children. Sofosbuvir belongs to the nucleotide polymerase inhibitors class of antiviral drugs. It works by lowering the body's hepatitis C virus (HCV) levels.

How to Use

- Sofosbuvir is available in tablet and pellet form for oral use. It is normally taken once a day, with or without food. Sofosbuvir Tablet 400 mg should be taken at the same time each day.
- Even though you feel fine, keep taking sofosbuvir. It must be used in conjunction with peginterferon alfa and ribavirin, or alone with ribavirin.
- Sofosbuvir is commonly given for 12 weeks in conjunction with peginterferon alfa and ribavirin. Sofosbuvir is commonly used for 12 to 24 weeks when combined with ribavirin.

- If you have liver cancer and are awaiting a liver transplant, you will continue sofosbuvir with ribavirin for up to 48 weeks and until the transplant is completed.
- The period of your therapy is determined by your problem, how well you react to the drug, and whether or not you have serious adverse effects. Unless your doctor tells you to, do not avoid taking sofosbuvir, peginterferon alfa, or ribavirin.

Precaution -

Sofosbuvir Tablet 400 mg

- If you have allergies to sofosbuvir, any other medicines, or any of the components in sofosbuvir tablets or pellets, inform your doctor immediately.
- Tell your doctor about any additional prescription or over-the-counter medications, vitamins, or nutraceuticals you're taking or planning to use. If you are taking one or more combination medications, your doctor may advise you not to take sofosbuvir or watch you for negative effects. Many other medicines may interfere with sofosbuvir, so make sure to notify about all of your current prescriptions.
- If you have or have ever had a liver transplant, human immunodeficiency virus (HIV), any sort of liver illness other than hepatitis C, kidney disease, or are on dialysis, tell your doctor.
- If you're pregnant, planning to become pregnant or think you could be, inform your doctor. Sofosbuvir Tablet 400 mg must be used with ribavirin, which is dangerous to the unborn child. During and for 6 months following your treatment with these medications, you must take birth control to prevent pregnancy.

Benefits of

Sofosbuvir Tablet

In Treatment of Chronic hepatitis C virus (HCV) infection

The HCV virus is prevented from replicating in your body with Sofosbuvir Tablet 400 mg. It aids in the control of infection and improves the immune system's performance. This reduces your risk of problems and enhances your overall quality of life. This medication is always given with other antiretroviral medications. It is not a cure for HCV infection and

should not be used to eliminate it. It is essential that you take this medication exactly as directed by your doctor, including the dosage. The benefit of the medicine is considerably enhanced by getting all doses in the correct amounts at the correct times.

Side Effects of

Sofosbuvir

The majorities of side effects are minor and will go away as your body adapts to the medication. If they don't go away or you're worried about them, see your doctor.

- Tiredness, headaches, nausea, diarrhoea, itchy skin, sleeping difficulties, and irritability are all possible side effects. Tell your doctor immediately if any of these side effects continue or worsen.
- Remember that your doctor recommended Sofosbuvir Tablet 400 mg because he or she believes the advantage to you exceeds the risk of adverse effects. Many persons who use this medicine have no major adverse effects.
- If you have any serious side effects, such as symptoms of a low red blood cell count, contact your doctor immediately once (such as abnormal tiredness, rapid breathing, pale skin, breathing problem, or fast heartbeat).

Tips for using Sofosbuvir Tablet

- Sofosbuvir Tablet 400 mg is used to treat chronic hepatitis C virus (HCV) infection in combination with other drugs.
- Even though you feel better, do not miss any doses and complete the entire course of treatment.
- When compared to other conventional treatments, it has fewer negative effects.
- Take it with food every day, particularly at the same time.
- This medicine will normally need to be taken every day for 12 to 24 weeks.
- Fatigue, dizziness, and vision problems are all possible side effects. Don't drive or do anything else that requires attention until you have a better understanding of how it affects you.

- Your liver function and the quantity of hepatitis C virus in your body may be regularly monitored by your doctor.
- Do not discontinue having Sofosbuvir Tablet without first consulting your doctor.
